Screen Selects Enfocus' Powerful PDF Technology for Trueflownet's Job Submission Products

Latest Version of Riteportal 2.0 and the New Riteonline 3.0 Portal Edition to Utilize Latest Enfocus PDF Library Technology

CHICAGO (PRINT 05) – September 9, 2005 – Enfocus Software, the world leader in PDF quality management solutions for the graphic arts industry; and Screen, one of the largest suppliers of innovative printing technology and equipment, today announce they have partnered to provide Riteportal and Riteonline customers with powerful Certified PDF capabilities made possible by integration of the Enfocus PDF Library. These new solutions featuring Enfocus PDF technology are being featured at Screen booth #6100 at Print 05 & Converting 05, taking place in Chicago from September 9-15.

New Screen Riteportal 2.0 and Riteonline V3 Portal Edition, now announced worldwide, incorporate Enfocus' PDF Library technology enabling powerful PDF tools and options. Utilizing the Enfocus PitStop Library, Riteportal and Riteonline users have access to the most sophisticated preflight, editing and certification capabilities for PDF documents starting at the creator's desktop. The technology platform also supports Enfocus Certified PDF workflows used for optimal PDF quality assurance and streamlining print production.

“The integration of PitStop Library with our own PDF-based technology represents a vital new addition to Screen's customer-centered products and service offerings,” says Eiji (A.J.) Kakiuchi, president of Screen (USA) and Screen Media Technology Company. “Screen is committed to developing innovative, comprehensive graphic communications solutions. Powerful synergies exist between Enfocus and Screen. Enfocus' expertise in preflighting and Certified PDF technology complements Screen's robust customer relationship management portals. These capabilities help strengthen the efficiency of Riteportal 2.0 and Riteonline 3.0 Portal Edition and enable us to provide a more productive digital workflow tailored to our customers' individual needs.”

Patrick Van Dam, Executive Vice President, Worldwide Sales & Marketing for Enfocus, says, “We are pleased that Screen has once again selected Enfocus PDF Library technology to power its innovative PDF workflow solutions. New Riteportal and Riteonline Portal Edition solutions simplify PDF creation and ensure quality production. We're pleased that Enfocus PDF technology continues to enhance Screen customers' PDF workflows.”

The Enfocus PitStop Library technology powering Riteportal and Riteonline Portal Edition easily integrates with Trueflow, which already has Enfocus technology inside. The combination offers print providers the most flexible, reliable PDF workflow on the market today.

Riteportal™ 2.0

Screen's Internet portal allows content creators to prepare and deliver error-free, production-ready Certified PDF files from any application. Easily tailored to a printer's production workflow, Riteportal simplifies the PDF creation, preflight, certification, encryption and delivery of pre-defined PDF files into a simple 'click-and-print' process from the desktop, for both online and offline delivery. The system eliminates the problems often associated with bad PDFs, such as incorrect profile settings and missing fonts. Certified PDFs created by customers are uploaded to the print site's Riteportal server and are automatically placed into pre-determined hot folders or print queues. As a result, print jobs get on press with fewer delays and quality results are guaranteed. Riteportal complies with JDF and PDF/X-1a open standards to ensure flexibility and scalability, and integrates easily with Trueflow.

Riteonline™ V3 Portal Edition

Riteonline V3 Portal Edition automates an end-to-end PDF print workflow that begins at the creative desktop. It integrates the robust PDF creation, preflight check and online job submission capabilities of the Riteportal customer portal with the streamlined ordering and approval processes of Riteonline.

Riteonline 3.0 Portal Edition contains a customized, printer-branded PDF creation client and a server-based web application. The client software takes advantage of built-in Adobe® PDF JobReady™ technology and Enfocus PitStop Library. Print providers can offer their clients reliable, highly-secure workflows based on Adobe PDF.

Clients create PDF files from any application that can print. Errors are identified and corrected before files are uploaded. An easy-to-use interface affords faster, more accurate print and document delivery. Clients can easily gain online access anytime to check on their job status and order reprints of documents in their own catalog area.

A turnkey software application, Riteonline V3 Portal Edition seamlessly integrates into the Screen Trueflownet workflow. Riteonline V3 Portal Edition also works with other solutions using JDF/JMF messaging, so it can be incorporated easily into an existing workflow. Print providers who desire more advanced capabilities may purchase the dynamic document option for document versioning and customizing. The system provides ultimate control over the document customization, print-ordering, and approval process. By reducing manual intervention, Riteonline reduces job cycle times, lowers costs and improves productivity.

About Screen

Screen is one of the world's largest suppliers of equipment to the printing industry. The Screen Media Technology division is part of the Dainippon Screen Group of companies supplying
